

The **NUTRA-LIX** Line of **HORSE PRODUCTS**

NUTRI-LIX PLUS for top performance

Nutra-Lix Plus supplies nutrients which encompass the nutritional needs of your horse's complete life cycle. Nutra-Lix Plus is specially formulated to provide the nutrients horses require for higher energy, increased stamina, overall health and appearance, and optimum performance.

Feed 1/2–2 oz./day. Packaged in 1 gallon container (128 fl. oz.).

JOINT-RITE for joint health

Today's performance horses have to meet increasing demands for speed, agility and strength. Demands on the equine athlete are now greater than ever. To meet this need, Nutra-Lix developed Joint-Rite – a nutraceutical aid for the treatment and prevention of joint problems in your horse. It is specially formulated to promote joint health in stress conditions.

Feed 1–2 oz./day. Packaged in 1 gallon container (128 fl. oz.).

BASIC for basic supplementation

Nutra-Lix Basic liquid horse supplement incorporates high quality proven ingredients – vitamins, minerals and essential amino acids from natural sources. It is formulated for casual-use horses who are getting a good quality forage in hay or grass and need a basic supplementation program.

Feed 1–2 oz./day. Packaged in 1 gallon container (128 fl. oz.).

SHINE for energy and conditioning

Nutra-Lix Shine linseed oil horse supplement provides an excellent source of energy. It is highly digestible, aids in body conditioning and improves the hair coat. Shine adds calories and contains 2.25 times the energy of corn. Its fat content is 98% fat, of which 56% is Linolenic fatty acid. It also contains vitamins A, D and E.

Feed 2–4 oz./day. Packaged in 1 gallon container (128 fl. oz.).

SOLID PERFORMANCE BLOCKS for supplementation of pastured horses

Supplementing your horse's nutritional needs has gotten even easier. Nutra-Lix formulated Solid Performance Blocks to supply the majority of the nutrients of their liquid Plus product in a solid format. Now you can supply the nutritional needs of your pastured horses with a 12% protein block fortified with Biotin, Lysine, Methionine and 5% fat for energy.

Packaged in 60 pound feeder.

HORSES HAVE ALWAYS BEEN IMPORTANT TO OUR SOCIETY

Horse numbers have actually increased in the United States in the past fifty years, from the time when their service was integral to our survival – agriculture, hunting, freight and transportation. We have evolved from using horses to pull our wagons and us to our destinations to pulling THEM to our destinations. The indispensable horse has been able to overcome almost any obstacle we have set in his way and to adapt to an unbelievable number of new challenges in the form of sports and events.

As horses play an increasingly important role in our lives, we continually ask them to better their performance. Many factors affect performance: bloodlines, training, disposition, conformation and both the horse's and rider's ability. After these criteria are met, the number one reason for variation in performance is nutrition. Your horse has to feel good and his body has to be in top athletic shape if you want to get optimum performance from him. Feeding the right combination of forages and supplements is a major factor.

Since the introduction of Nutra-Lix Plus horse supplement into the marketplace, we have continued evaluating the needs of the competitive horse. While Nutra-Lix Plus provides an excellent supplement for many horsemen and competitors, we realize that horses have a variety of nutritional needs. Nutra-Lix, Inc. has developed a complimentary line of horse supplements to help meet a variety of nutritional needs: Nutra-Lix Basic, Nutra-Lix Shine and Nutra-Lix Joint-Rite!

THE SOLUTION for all your **EQUINE** **SUPPLEMENTAL NEEDS**

WHY IS SUPPLEMENT IMPORTANT FOR THE PERFORMANCE HORSE?

Supplement is by definition:

- Something that completes
- Making up for a deficiency
- To extend or strengthen the whole

It is important to remember that the performance demands of the equine athlete have changed throughout the years and increased nutritional feeding requirements. The active equine athlete can no longer subsist on fibrous forage and maintain a healthy, energetic and competitive existence.

DEVELOPING A SUPPLEMENTAL FEEDING PROGRAM

When developing a supplemental feeding program for your horse, consider the horse's work load and incorporate a dietary supplement as a normal part of the training regimen. Not all horse supplements are created equal. Many times, the cost per gallon is secondary to the levels of ingredients included. Compare the ingredients and the amount supplied for each one to determine the best nutrient value.

Bromelain			500 mg
Perna Mussel			2,500 mg
Yucca Schidigera Plant Extract			60 mg
MSM methylsulfonylmethane			1,000 mg
Grape Seed Extract			15 mg

NUTRACEUTICALS

Glucosamine (HCl):

- Needed for healthy cartilage connective tissues and synovial fluid
- Helps with eyes, blood vessels and heart valves
- Vital precursor in the synthesis of cartilage-forming cells (chondrocytes) and production of hyaluronic acid

Chondroitin:

- Stimulates joint cartilage growth
- Reduces cartilage degradation
- Aids in increasing and maintaining joint health

MSM (methylsulfonylmethane):

- Aids in reducing epiphysitis and relieving joint pain and swelling
- A dietary sulfur
- A mineral needed to synthesize vitamins and amino acids

Bromelain:

- An anti-inflammatory agent
- Helpful in healing minor injuries – particularly sprains, strains, and muscle injuries
- Aids the pain, swelling and tenderness that accompany sporting injuries

Perna Mussel:

- Balances the lubricating fluids of the body
- Helpful in healing soft tissue, torn tendons and bruises

Vitamin E:

- Essential for the integrity and optimum function of reproductive, muscular, circulatory, nervous and immune systems
- A potent antioxidant
- Aids in healing

Grape Seed:

- A potent antioxidant
- Counteracts aging and stress effects
- Aids in healing and may have non-steroidal anti-inflammatory effects
- Estimated to be 20 times stronger than Vitamin C and 50 times stronger than Vitamin E

Choline:

- Important to nerve impulse transfer and to fat and amino acid (protein) metabolism
